dale seymour publications developing skills in algebra

SUMMARY: 16 sets of maths problems for grades 4-6.

The primary aim of this book is to provide teachers of mathematics with all the tools they would need to conduct most effective mathematics instruction. The book guides teachers through the all-important planning process, which includes short and long-term planning as well as constructing most effective lessons, with an emphasis on motivation, classroom management, emphasizing problem-solving techniques, assessment, enriching instruction for students at all levels, and introducing relevant extracurricular mathematics activities. Technology applications are woven throughout the text.A unique feature of this book is the second half, which provides 125 highly motivating enrichment units for all levels of secondary school mathematics. Many years of proven success makes this book essential for both pre-service and in-service mathematics teachers.

Do the new math standards have you scrambling? Have you been searching for pattern blocks, multilink cubes, prisms, tangrams, or puzzles to use in your next lesson? Do you want to know where to find the best calculators, math books, games, reproducibles, toys, or other math materials? You'll find math resources quickly and easily with Perry's new guide! Organized by such topics as problem solving, estimation, number sense and numeration, and geometry and spatial relationships, this book shows you where to find the manipulatives and materials you need to support the new NCTM standards. Each product is briefly described along with its classroom applications. Materials of exceptional quality and value are indicated. Even the addresses of publishers and suppliers are given. If you're looking for ways to make the implementation of the standards easier, you'll want this book. It's a great resource and a real time-saver!

Series of four algebra workbooks This set of four problem-solving books follows the traditional one-year algebra course, covering the main algebraic principles. Book A begins the year with exercises in simplifying numerical expressions and moves on to one-variable equations. Book B follows with operations in polynomials, solving polynomial equations, and working with rational expressions. Book C involves proportions, graphing linear equations, plus inequalities and absolute value equations. Book D completes the course with roots and radicals, quadratic equations, and analysis of quadratic equations. Interest Level: 8-12

Getting Smarter Every Day is a selection of activities, puzzles, ideas, information, and graphics to excite, enrich, challenge, instruct, amaze, and entertain students. This program aims to broaden student perspectives on what mathematics really is and its application in the real world.This program will help students develop the ability to understand an apply mathematics in everyday life, also known as numeracy. Four major instructional approaches are used to develop numeracy, leading to student success in mathematics: Discussion and interaction Active exploration Visualization and estimation Interrelating conceptsActivities can be used to supplement an existing program in the form of homework or in-class. The program is also flexible and can be used in group settings, as extra practice for individual students, or for whole-class.To view sample lessons and pages, click on the appropriate ISBN # below.

Create your own graphs with 168 blackline masters, ready to be photocopied. Square, triangular, hexagonal, and polar coordinate grids; faint-line sketching grids and dot pattern paper; standard measure paper with divisions from 1" to .0625"; and metric measure paper with divisions from 2 cm to 0.2 cm.

Sixteen teachers. Sixteen journeys. All on a quest to become outstanding teachers of writing. All taking different paths to acquire and hone those skills that make a teacher effective. From kindergarten to college, teachers are faced with the daunting task of instilling the art of writing in their students. From creative writing to research, the art of writing incorporates the writing process to create the inking of our thinking. These 16 teachers from across the nation have traveled a long and arduous path to seek and to reach for the methods and strategies that will make them successful writing teachers. These are their stories.

This book discusses conceptual and pragmatic issues in the assessment of statistical knowledge and reasoning skills among students at the college and precollege levels, and the use of assessments to improve instruction. It is designed primarily for academic audiences involved in teaching statistics and mathematics, and in teacher education and training. The book is divided in four sections: (1) Assessment goals and frameworks, (2) Assessing conceptual understanding of statistical ideas, (3) Innovative models for classroom assessments, and (4) Assessing understanding of probability.
