Towards a Vegan Jurisprudence: The Need for a Reorientation of Human Rights argues that, in order to give effect to animal rights, human society is obliged to question the extent to which our social norms permit us to manifest compassionate justice to other animals. Jeanette Rowley posits a new perspective on the theory and practice of human rights to accommodate the demands of vegans for rights for nonhuman animals, recognizing the existing argument that the idea grounding human rights is our ethical responsibility to the precarious, mortal other. Rowley develops this principle to ground the rights claims of vegans in the ethics of alterity, applying the concept to nonhuman others to ground the protection of other animals and provide a new approach to human rights litigation to accommodate vegans, calling for the reconceptualization of the very idea of human rights.

Given the global crises confronting the world today, it is important to interrogate the notion of "the modern state" and to evaluate its effectiveness in providing security and services for its populations, including the most disadvantaged and vulnerable. This book investigates the modern state's capacity to serve its constituents by examining the organisations that facilitate two key elements of contemporary living: social capital and social enterprise. These elements are explored in a series of rich case studies located in Australia, Ireland and Bangladesh, with broader implications for policy and practice in the rest of the world. The case studies highlight the growing importance of social enterprise and social entrepreneurship in fostering social capital and in contributing to the idea of "the enabling state". This book will appeal to researchers, policy-makers and community leaders working in business, education, employment pathways, homelessness, housing, local government, mental health, public administration and refugee resettlement.

The report Financing of Organised Crime contributes to a better understanding of the financial aspects of organised crime. The analysis explores topics such as the sources and mechanisms for financing organised crime, settlement of payments, access to financing in critical moments, costs of business and the management of profits. Drawing on the results of the analysis, the report also suggests possible new approaches to tackling organised crime.

This ground breaking textbook looks at the issue of managing across cultures: the difficulties and opportunities it brings and the competencies needed to handle situation and create solutions. Applying a constructive approach, Intercultural Management demonstrates how cultural diversity can be used as a resource to demonstrate synergy and complementarity. Taking a case-based approach, its innovative case studies examine a wide range of topics in international management, helping students to explore theory in the context of real-life situations. Taking the form of an edited collection, it offers a fascinating range of perspectives from a global panel of experts in the discipline. This will be the ideal companion to students taking courses on intercultural, cross-cultural, and international management at undergraduate, postgraduate and MBA level. It will also be valuable reading for organisations seeking to improve their intercultural management strategies.

The near-unanimous consensus among climate scientists is that the massive burning of gas, oil, and coal is having cataclysmic impacts on our atmosphere and climate. These climate and environmental impacts are particularly magnified and debilitating for low-income communities and communities of color. Energy democracy tenders a response and joins the environmental and climate movement with broader movements for social and economic change in this country and around the world. Energy Democracy brings together racial, cultural, and generational perspectives to show what an alternative, democratized energy future can look like. The book will inspire others to take up the struggle to build the energy democracy movement.

From a renowned group of international scholars, this new work examines how leading economic countries use sport business to drive and further economic development by raising brand awareness (country as a brand), transforming lagging communities, and enhancing travel and tourism in the country.

Designed to promote active, hands-on learning, this unique book is composed of 11 chapter-length case studies that prepare students to address the types of challenging social issues they will encounter as practicing social workers. The cases—covering topics from immigration, gangs, and education to race, mental health, and end-of-life care—illustrate the interrelationship between the micro, mezzo, and macro levels and facilitate not just recall of facts, but also higher-level learning. Each case allows students to confront realistic scenarios as they evaluate, analyze, and synthesize information, resulting in more engaged and informed classroom discussions.
