With this ebook, you can find all B.Com 1st Year Financial Accounting Notes Accounting: Meaning, Scope and Importance, Branches of Accounting, Accounting Concepts and Conventions, Double Entry System, Preparation of Journal, Subsidiary Books including Cash Book, Ledger, Trial Balance, Preparation of Final Accounts of Sole Traders and Partnership Firms. Bank Reconciliation Statement, Distinction between Capital and Revenue items, Depreciation Methods and Accounting including AS-6, Accounts of Non-Trading Concerns including Hospital and Educational Institutions. Accounts relating to Partnership: Admission, Retirement and Death of a Partner, Dissolution of Partnership, Amalgamation of Firms, Sale of Firm to a Company, Gradual Realisation of Assets and Piece Meal Distribution.

The Fourth Edition of this text, which is a thoroughly revised and enlarged version of Financial Accounting, 3rd ed., by the first author, gives a clear analysis of the fundamental concepts of financial accounting. Organized into 15 chapters, the book begins with a discussion on the objectives of accounting and accounting information as well as the theory base of accounting and accounting standards. Then it goes on to give a detailed discussion on various source documents and vouchers required for recording transactions. Besides, the book describes what are subsidiary books of business such as cash book and bills payable book as also the techniques of preparing trial balance, final accounts, accounts of non-trading organizations, accounts from incomplete records, consignment accounts and joint venture accounts. Finally, the book covers hire purchase system, branch accounts, and dissolution of a partnership firm. This well-organized and student-friendly book is intended as a text for undergraduate students of commerce (B.Com. Programme/B.Com. Pass) in universities across India. In addition, it would be useful for professionals pursuing CA, ICWA and CS courses. KEY FEATURES 1 Includes 300 worked-out examples to illustrate the concepts discussed. 1 Provides 250 unsolved problems in a graded manner for the benefit of students. 1 Contains a variety of end of chapter questions.

This book has been written specifically for the students of B.Com (Hons) of the University of Delhi in accordance with its prescribed syllabus and that of School of Open Learning. Its basic features are the same as the mother book Cost Accounting|Principles and Practice, which is a UGC recommended text for the last many years. Thus, it gives a thorough grounding in cost concepts, cost behaviour, and costing methods. The subject matter has been organized on |first things first| basis to sustain the interest of the students. Every discussion involving conceptual difficulties is immediately followed by a numerical example.

The text and images in this book are in grayscale. A hardback color version is available. Search for ISBN 9781680922929. Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

Understanding the basics of financial accounting can be a tricky task to master. This practical guidebook provides an overview of the fundamental principles in a jargon-free and simple format. Financial Accounting: The Basics provides concise overviews of the key financial accounting topics supplemented by practical examples and exercises to enable readers to test their knowledge and understanding in bite-sized chunks. In empowering students to learn at their own pace, the book enhances course learning to maximise chances of overall success. Topics covered include: The interpretation of financial statements and the accounting equation Processing accounting information Accounting for inventories Non-current assets and depreciation Cash flow statements and analysis With the latest coverage of International Financial Reporting Standards (IFRS) terminology, and separate chapters on cash flow statements and ratio analysis, Ilias Basioudis's text will be valuable reading for new students of accounting.

Introductory Accounting adopts a measurement approach to teaching graduate students the basics of accounting. Integrating both financial and managerial principles from the U.S. and around the globe, it links accounting to other areas of business (such as finance, operations, and management). Providing students with the context to understand how and why accounting is a valuable part of business, readers will gain an understanding of accounting's role in financial analysis and managerial decision-making. Tinkelman discusses accounting as an imperfect measurement system, offering guidance on how quantitative data can benefit analysts and managers when used with an understanding of its limitations. The book is strongly grounded in research, and also draws on plenty of examples and cases to bring these issues to life. The conversational style of Introductory Accounting will appeal to MBA students, while key terms and illustrative problems make assignments easy for instructors. Additional materials for students and instructors are available on the book's companion website.

Useful for UG and PG students
