It sounds good to be warning us against “ barbarism with a human face, ” but it happens a lot. During the Ebola epidemic, hospitals all over West Africa, even some operated by charitable organizations, applied a principle of triage: “ is this patient an African or an expat? ” The expats were flown out, got the necessary care, and mostly survived.

Is Barbarism with a Human Face Our Fate? | In the Moment

In anarchism, the subhuman and the superhuman are confounded, to the advantage of hope. For in the less-than-human qualities of man the hedonist can be found more-than-human omens of man the divine (p. 81). In proposing an alternative to the liberal god-beast, Barber seems for a moment to flirt with a traditional, "in-between" view of human ...

A barbarian is a human who is perceived to be either uncivilized or primitive. The designation is usually applied as a generalization based on a popular stereotype; barbarians can be members of any nation judged by some to be less civilized or orderly (such as a tribal society) but may also be part of a certain "primitive" cultural group (such as nomads) or social class (such as bandits) both ...

In this unprecedented critique, Bernard-Henri Lévy revisits his political roots, scrutinizes the totalitarianisms of the past as well as those on the horizon, and argues powerfully for a new political and moral vision for our times. Are human rights Western or universal? Does anti-Semitism have a future, and, if so, what will it look like? And how is it that progressives themselves—those who in the past defended individual rights and fought fascism—have now become the breeding ground for new kinds of dangerous attitudes: an unthinking loathing of Israel; an obsessive anti-Americanism; an idea of " tolerance " that, in its justification of Islamic fanaticism, for example, could become the " cemetery of democracies " ; and an indifference, masked by relativism, to the greatest human tragedies facing the world today? At a time of ideological and political transition in America, Left in Dark Times articulates the threats we all face—in many cases without our even being aware of it—and offers a powerful new vision for progressives everywhere.

One of the West ' s leading intellectuals offers a provocative look at America ' s withdrawal from world leadership and the rising powers who seek to fill the vacuum left behind. The United States was once the hope of the world, a beacon of freedom and the defender of liberal democracy. Nations and peoples on all continents looked to America to stand up for the values that created the Western

world and to oppose autocracy and repression. Even when America did not live up to its ideals, it still recognized their importance, at home and abroad. But as Bernard-Henri Lévy lays bare in this powerful and disturbing analysis of the world today, America is retreating from its traditional leadership role, and in its place have come five ambitious powers, former empires eager to assert their primacy and influence. Lévy shows how these five—Russia, China, Turkey, Iran, and Sunni radical Islamism—are taking steps to undermine the liberal values that have been a hallmark of Western civilization. *The Empire and the Five Kings* is a *cri de coeur* that draws upon lessons from history and the eternal touchstones of human culture to reveal the stakes facing the West as America retreats from its leadership role, a process that did not begin with Donald Trump's presidency and is not likely to end with him. The crisis is one whose roots can be found as far back as antiquity and whose resolution will require the West to find a new way forward if its principles and values are to survive. As seen on *Real Time with Bill Maher* (2/22/2019) and *Fareed Zakaria GPS* (2/17/2019).

What does it mean to be an American, and what can America be today? To answer these questions, celebrated philosopher and journalist Bernard-Henri Lévy spent a year traveling throughout the country in the footsteps of another great Frenchman, Alexis de Tocqueville, whose *Democracy in America* remains the most influential book ever written about our country. The result is *American Vertigo*, a fascinating, wholly fresh look at a country we sometimes only think we know. From Rikers Island to Chicago mega-churches, from Muslim communities in Detroit to an Amish enclave in Iowa, Lévy investigates issues at the heart of our democracy: the special nature of American patriotism, the coexistence of freedom and religion (including the religion of baseball), the prison system, the “return of ideology” and the health of our political institutions, and much more. He revisits and updates Tocqueville’s most important beliefs, such as the dangers posed by “the tyranny of the majority,” explores what Europe and America have to learn from each other, and interprets what he sees with a novelist’s eye and a philosopher’s depth. Through powerful interview-based portraits across the spectrum of the American people, from prison guards to clergymen, from Norman Mailer to Barack Obama, from Sharon Stone to Richard Holbrooke, Lévy fills his book with a tapestry of American voices—some wise, some shocking. Both the grandeur and the hellish dimensions of American life are unflinchingly explored. And big themes emerge throughout, from the crucial choices America faces today to the underlying reality that, unlike the “Old World,” America remains the fulfillment of the world’s desire to worship, earn, and live as one wishes—a place, despite all, where inclusion remains not just an ideal but an actual practice. At a time when Americans are anxious about how the world perceives them and, indeed, keen to make sense of themselves, a brilliant and sympathetic foreign observer has arrived to help us begin a new conversation about the meaning of America.

"A gripping synthesis of philosophy and reportage" (*The New York Times*), this book tells the explosive truth about the murder of American journalist Daniel Pearl.

A trenchant look at how the coronavirus reveals the dangerous fault lines of contemporary society As seen on CNN's *Fareed Zakaria GPS*: “A stirring alarm addressed to an unsettled world.” (Kirkus Reviews) Forget the world that came before. The author of *American Vertigo* serves up an incisive look at how COVID-19 reveals the dangerous fault lines of contemporary society. With medical mysteries, rising death tolls, and conspiracy theories beamed minute by minute through the vast web universe, the coronavirus pandemic has irrevocably altered societies around the world. In this sharp essay, world-renowned philosopher Bernard-Henri Lévy interrogates the many meanings and metaphors we have assigned to the pandemic—and what they tell us about ourselves. Drawing on the philosophical tradition from Plato and Aristotle to Lacan and Foucault, Lévy asks uncomfortable questions about reality and mythology: he rejects the idea that the virus is a warning from nature, the inevitable result of global capitalism; he questions the heroic status of doctors, asking us to think critically about the loci of authority and power; he challenges the panicked polarization that dominates online discourse. Lucid, incisive, and always original, Lévy takes a bird’s-eye view of the most consequential historical event of our time and proposes a way to defend human society from threats to our collective future. A portion of the author’s proceeds will be donated to Binc (The Book Industry Charitable Foundation).

The international publishing sensation is now available in the United States—two brilliant, controversial authors confront each other and their enemies in an unforgettable exchange of letters. In one corner, Bernard-Henri Lévy, creator of the classic *Barbarism with a Human Face*, dismissed by the media as a wealthy, self-promoting, arrogant do-gooder. In the other, Michel Houellebecq, bestselling author of *The Elementary Particles*, widely derided as a sex-obsessed racist and misogynist. What began as a secret correspondence between bitter enemies evolved into a remarkable joint personal meditation by France’s premier literary and political live wires. An instant international bestseller, *Public Enemies* has now been translated into English for all lovers of superb insights, scandalous opinions, and iconoclastic ideas. In wicked, wide-ranging, and freewheeling letters, the two self-described “whipping boys” debate whether they crave disgrace or secretly have an insane desire to please. Lévy extols heroism in the face of tyranny; Houellebecq sees himself as one who would “fight little and badly.” Lévy says “life does not ‘live’” unless he can write; Houellebecq bemoans work as leaving him in such “a state of nervous exhaustion that it takes several bottles of alcohol to get out.” There are also touching and intimate exchanges on the existence of God and about their own families. Dazzling, delightful, and provocative, *Public Enemies* is a death match between literary lions, remarkable men who find common ground, confident that, in the end (as Lévy puts it), “it is we who will come out on top.”

As an unprecedented global pandemic sweeps the planet, who better than the supercharged Slovenian philosopher Slavoj Žižek to uncover its deeper meanings, marvel at its mind-boggling paradoxes and speculate on the profundity of its consequences? We live in a moment when the greatest act of love is to stay distant from the object of your affection. When governments renowned for ruthless cuts in public spending can suddenly conjure up trillions. When toilet paper becomes a commodity as precious as diamonds. And when, according to Žižek, a new form of communism – the outlines of which can already be seen in the very heartlands of neoliberalism – may be the only way of averting a descent into global barbarism. Written with his customary brio and love of analogies in popular culture (Quentin Tarantino and H. G. Wells sit next to Hegel and Marx), Žižek provides a concise and provocative snapshot of the crisis as it widens, engulfing us all.

An unflinching look at the most urgent humanitarian crises around the globe, from one of the world’s most daring philosopher-reporters “Fierce and elegant, Lévy’s musings will be of profound interest to any reader of modern continental philosophy.” —Kirkus Reviews, starred review Over the past fifty years, renowned public intellectual Bernard-Henri Lévy has reported extensively on human rights abuses around the world. This new book follows the intrepid Lévy into eight international hotspots—in Nigeria; Syrian and Iraqi Kurdistan; Ukraine; Somalia; Bangladesh; Lesbos, Greece; Libya; and Afghanistan—that have escaped global attention or active response. In a deeply personal introduction, Lévy recounts the intellectual journey that led him to advocacy, arguing that a truly humanist

philosophy must necessarily lead to action in defense of the most vulnerable. In the second section, he reports on the eight investigative trips he undertook just before or during the coronavirus pandemic, from the massacred Christian villages in Nigeria to a dangerously fragile Afghanistan on the eve of the Taliban talks, from an anti-Semitic ambush in Libya to the overrun refugee camp on the island of Lesbos. Part manifesto, part missives from the field, this new book is a stirring rebuke to indifference and an exhortation to level our gaze at those most hidden from us.

Barbarism represents a critique, from the perspective of Michel Henry's unique philosophy of life, of the increasing potential of science and technology to destroy the roots of culture and the value of the individual human being. For Henry, barbarism is the result of a devaluation of human life and culture that can be traced back to the spread of quantification, the scientific method and technology over all aspects of modern life. The book develops a compelling critique of capitalism, technology and education and provides a powerful insight into the political implications of Henry's work. It also opens up a new dialogue with other influential cultural critics, such as Marx, Husserl, and Heidegger. First published in French in 1987, Barbarism aroused great interest as well as virulent criticism. Today the book reveals what for Henry is a cruel reality: the tragic feeling of powerlessness experienced by the cultured person. Above all he argues for the importance of returning to philosophy in order to analyse the root causes of barbarism in our world.
