From "Ireland`s finest living novelist" (Roddy Doyle)—a funny, moving, exquisitely written novel about a community on the cusp of change Acclaimed Irish author Dermot Healy`s first novel in more than ten years is a rich, beguiling, and wonderfully funny story about community, family, love, and bonds across generations, an epic in miniature that features an unforgettable cast of innocents and broken eccentrics. The novel presents the bemusing and unsettling misadventures of Philip Feeney, known to one and all as Mister Psyche, a teenager haunted by a recent traumatic event who takes up with two men some fifty years his senior. Its still, lyrical power casts a miraculous literary spell and will appeal to readers of William Trevor, Roddy Doyle, John McGahern, and Anne Enright.

By the bestselling author of Voluntary Simplicity (over 150,000 sold) • Brings together cutting-edge science and ancient spiritual wisdom to demonstrate that the universe is a living, sentient system and that we are an integral part of it • Explores the power of this new paradigm to move humanity toward a sustainable and promising future Science has traditionally regarded the universe as mostly made up mostly of inert matter and empty space. At one time this point of view was liberating, part of the Enlightenment-born rationalism that helped humanity free itself from superstition and fear and achieve extraordinary intellectual and technological breakthroughs. But this paradigm has outlived its usefulness. It has led to rampant materialism and environmental degradation—if the universe is essentially dead and we are alive, then the inanimate stuff of the universe should be ours to exploit. But we now know that not only is the view of a dead universe destructive, it is also inaccurate and misleading. In The Living Universe, Duane Elgin brings together evidence from cosmology, biology, physics, and even his participation in NASA-sponsored psychic experiments to show that the universe is permeated by a living field and that we are always in communion with that field of aliveness whether we are conscious of it or not. This is a world-view that, as Elgin explains, is shared by virtually every spiritual tradition, and the implications of it are vast and deep. In a living system, each part is integral to the whole, so each of us is intimately connected to the entire universe. Elgin eloquently demonstrates how our identity manifests itself on a whole series of levels, from subatomic to galactic. We are, he writes, "far more than biological beings—we are beings of cosmic connection and participation." To confront our ongoing planetary crisis of dwindling resources and escalating conflict, we need to move past an ideology of separation, competition, and exploitation. Duane Elgin asks us to see humanity sharing in the same field of aliveness, to discover how to live sustainably and harmoniously within the living universe.

Sometimes the big and small decisions in life seem overwhelming. How do you know what choices to make about your career, kids, relationships? Even when you make good decisions, how do you avoid temptation along the way? In What to Do When You Don`t Know What to Do, Dr. David Jeremiah walks you through the book of James to glean God`s wisdom on issues such as finances, faith, and decision making. Most significantly, this practical book shows you how to have the kind of faith that perseveres in persecution, resists temptation, and responds obediently to God`s Word. What does it look like to consider God in all your plans, depend on God rather than wealth, and put prayer above your personal efforts? It looks, as James discovered, like living a life of great joy.
