R100RT, R100GS and R100R.

The air-cooled boxer BMW twins were among the most significant motorcycles of the late 1970s and 1980s, providing an unparalleled combination of comfort, reliability, and performance. Written by a world-renowned motorcycle journalist and featuring 190 colour photographs, here is the authoritative work on these machines.

When the R100RS first came on the scene in 1977, it caused a complete sensation. Sporting a revolutionary wedge-shaped fairing that offered the rider near total enclosure, it provided unparalleled riding ease and protection. When fitted with optional saddlebags it sang the song of the open road that BMW riders cherished: long distances at high speeds with comfort and convenience. The first modern street motorcycle with a frame-mounted fairing, it was not only the most stunning BMW model, but with its new 980cc flat-twin motor, also the most powerful. Soon, a vast aftermarket sprang up around it with all sorts of updates for its suspension, handling, and power, as well as a large community of loyal fans and owners which exists to this day. Stermer's timeless book is the engaging story of where that legendary motorcycle came from including an interview with designer Hans Muth, what it was like to ride, and what it meant to motorcycling, told well and with luscious full-color photographs. Stermer's insightful insider's view of this storied machine shows why it continues to live on as one of the most recognizable and groundbreaking machines of our times.

Part of the acclaimed Original series, Original BMW Air-Cooled Boxer Twins presents BMW's most famous motorcycles in exquisite detail. The book focuses on the post-1969 /5 and newer series, paying particular attention to such groundbreaking models as the R75/5, the R90S, the R100RS, and the R80G/S. The book also covers the earlier models in a chapter focusing on the Earles fork machines.
