Classic Books Library presents this brand new edition of “The Federalist Papers”, a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. “The Federalist”, as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyse the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States.

Alexander Hamilton (c. 1755–1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799–1800 and founded the Federalist Party, the system that governed the nation's finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

The Federalist Papers,(#s 1-85), written by Madison, Hamilton and Jay in 1787 are regarded as the third most important historical documents in the United States, after the Declaration of Independence and the US Constitution. The Federalist Papers were written in order to explain the need for, as well as to persuade the citizens of the State of New York to support the ratification of the US Constitution. At the time the power and influence of the members of the legal profession and their ability to unconstitutionally control all government as a same hands faction was neither anticipated nor therefore specifically addressed in the US Constitution. It is now an unfortunate fact. These new Federalist Papers were written as a continuation of the original Papers in order to alert the Nation to the illegal actions of the legal profession in unconstitutionally taking over all government and thus undermining the basic implied doctrine of the separation of powers of the US Constitution. Lawyers have successfully taken over 100% of the Judiciary branch of government, and partly as a result, have also successfully become a plurality or a majority of both the House and the Senate. Moreover, a plurality or majority of lawyers have been Presidents of the United States and thereby often also controlled the Executive Branch as well. The result has been effective control of all government by what James Madison called a 'same hands faction' that he described as any group that had a particular interest opposed to the general interest of all. Every Trade Union, Professional and Trade group, as well as any group whose particular interests in the advancements of its members is opposed to the general interest of all constitutes such a group. The members of the legal profession constitute the only single group that can control all government because they and they alone are in a position to control the Judiciary, one of the three branches of government. They have done so, in defiance and direct violation of their oaths of office as officers of the Court and their obligation to uphold the US Constitution. The result is that they have transformed what on paper is the best legal system in the world to arguably one of the worst. A system in which the oxymoronic concept of 'amoral ethics' has replaced the concept of integrity. A system in which frivolous lawsuits make a mockery of justice. A system in which national health care is subjected to the enormous unnecessary cost and budget breaking impact of defensive medicine practiced by health care givers in fear for their financial survival as a result of a lawsuit, even if they do nothing wrong. Who therefore are forced to expend otherwise unnecessary enormous sums of public and private money in 'protective' testing of patients, made necessary to create its complete a potential defense as possible in a frivolous lawsuit. Howard Dean, a top Democrat, when asked "Why won't Congress address tort reform, as part of the new 2010 Health Care Plan?", responded "Because the trial lawyers won't let us" Unless and until the unconstitutional power of the legal profession is broken this Nation will continue to suffer in every area of its national life, even if the people of this land have not yet understood that. These new Federalist Papers were written to provide the legal basis for restoring constitutional government and the breaking of the monopolistic, illegal control by lawyers of all government.

A careful evaluation of the nature and effects of the separation of the executive and legislative branches, Charles O. Jones treats specific developments in presidential-congressional relations by analyzing the experiences and styles of Lyndon B. Johnson, Richard Nixon, Gerald Ford, Jimmy Carter, Ronald Reagan, George Bush, and Bill Clinton.

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

The Government Printing Office (GPO) is the principal agent for federal printing. Specifically, all printing for the three branches of government with a few exceptions is required to be done by GPO. GPO also disseminates and sells government publications through programs managed by the Superintendent of Documents. The Superintendent disseminates government publications to the public through the depository library program and sells publications online, through 23 bookstores, and by mail order. Until recently, the dissemination and sales programs dealt mostly in paper, microfiche, or CD-ROM formats. However, advances in electronic publishing technologies and the availability of government publications on the World Wide Web are affecting paper-based dissemination and sales and are raising questions about the direction and future of the Federal Depository Library Program. The conference report 1 for the legislative branch appropriations for 2001 required that we submit to you, by March 30, 2001, a study on electronic dissemination of government information. Specifically, we were required to.

This paper argues for the centrality and fundamental indispensability of judicial power within 'Westminster-model' constitutional systems. I seek to examine herein the interaction between judicial power and the executive and legislative branches of government, which - by virtue of their periodic accountability to the electorate - are collectively referred to as the 'political branches'. This paper contemplates the ways in which the roles and the personnel of the political branches overlap with judicial power in the context of 'Westminster-model' constitutionalism. Further, I consider how the judicial power can be restricted or impinged upon by the executive and legislative branches, analyzing three paradigm scenarios in particular - the use of 'ouster clauses' (in ordinary legislation as well as in written constitutions), the transfer and/or outright restriction of courts' judicial powers, and the concept of 'non-justiciability'. Through a study of judicial responses to these scenarios, this paper asserts the immutable nature of judicial power within the Westminster model of constitutionalism.This essay is part of a broader project that enquires into the fundamental nature and extent of judicial power within the 'Westminster' model of constitutionalism, which characteristically houses a 'partial' or 'incomplete' separation of powers.
