Celebrities are treated like modern religious icons within our media - and entertainment-saturated society. Why? This unprecedented book examines the historical, psychological, and sociological roots of our culture's fascination with famous personalities. The authors are a team of interdisciplinary researchers who have launched the only systematic study of the worldwide phenomenon known as "celebrity worship." They have spent the last four years trying to learn more about how and why some people become celebrity worshippers. Their work has been published in some of the most prestigious psychology journals. Now they have summarized and integrated their findings with classic works on the topic. Written to be accessible to professionals, students, and the general public, this text provides a thoughtful and provocative analysis of why society feeds upon and reinforces the fantasy of celebrities and what variables may turn a healthy respect for celebrities into an unhealthy preoccupation.

religion. The book argues for celebrity as a foundational component for any consideration of the relationship between religion, media and culture. Celebrity worship is seen as a vibrant and interactive discourse of the sacred self in contemporary society. Topics discussed include: Celebrity culture. Celebrity worship and project of the self as the new sacred. Social media and the democratisation of celebrity. Reactions to celebrity death. Celebrities as theologians of the self. Christian celebrity. Using contemporary case studies, such as lifestyle television, the religious vision of Oprah Winfrey and the death of David Bowie, this book is a gripping read for those with an interest in celebrity culture, cultural studies, media studies, religion in the media and the role of religion in society.

‘Presumed intimacy’ refers to a relationship that requires instant trust, confidence, disclosure and the recognition of vulnerability. Chris Rojek investigates the impact of relationships of ‘presumed intimacy’, where audiences form strong identifications with mediated others, whether they be celebrities, political personae or online friends. Arguing that the way the media are able to manage these relationships is a significant aspect of their power structure, the core of the book is an investigation into the complicity of the media in encouraging presumed intimacy and the cultural, social and political consequences arising from this. Beyond this, it examines how intimacy is performed as a masquerade in many social settings – the scripts we follow in social settings that try to manufacture a shortcut to intimacy. A compelling look into mediated relationships in the network society, *Presumed Intimacy* will be a key contribution to the critical analysis of society, media and culture.
