Concepts shape how we understand and participate in international legal affairs. They are an important site for order, struggle and change. This comprehensive and authoritative volume introduces a large number of concepts that have shaped, at various points in history, international legal practice and thought; intimates at how the many projects of international law have grappled with, and influenced, the world through certain concepts; and introduces new concepts into the discipline.

A damning exploration of the many ways in which the effects and logic of anti-black colonialism continue to inform our modern world. Colonialism and imperialism are often thought to be distant memories, whether they're glorified in Britain's collective nostalgia or taught as a sin of the past in history classes. This idea is bolstered by the emergence of India, China, Argentina and other non-western nations as leading world powers. Multiculturalism, immigration and globalization have led traditionalists to fear that the west is in decline and that white people are rapidly being left behind; progressives and reactionaries alike espouse the belief that we live in a post-racial society. But imperialism, as Kehinde Andrews argues, is alive and well. It's just taken a new form: one in which the U.S. and not Europe is at the center of Western dominion, and imperial power looks more like racial capitalism than the expansion of colonial holdings. The International Monetary Fund, World Bank, World Trade Organization and even the United Nations are only some of these modern mechanisms of Western imperialism. Yet these imperialist logics and tactics are not limited to just the west or to white people, as in the neocolonial relationship between China and Africa. Diving deep into the concepts of racial capitalism and racial patriarchy, Andrews adds nuance and context to these often over-simplified narratives, challenging the right and the left in equal measure. Andrews takes the reader from genocide to slavery to colonialism, deftly explaining the histories of these phenomena, how their justifications are linked, and how they continue to shape our world to this day. The New Age of Empire is a damning indictment of white-centered ideologies from Marxism to neoliberalism, and a reminder that our histories are never really over.

The pamphlet here presented to the reader was written in the spring of 1916, in Zurich. In the conditions in which I was obliged to work there I naturally suffered somewhat from a shortage of French and English literature and from a serious dearth of Russian literature. However, I made use of the principal English work on imperialism, the book by J. A. Hobson, with all the care that, in my opinion, work deserves. This pamphlet was written with an eye to the tsarist censorship. Hence, I was not only forced to confine myself strictly to an exclusively theoretical, specifically economic analysis of facts, but to formulate the few necessary observations on politics with extreme caution, by hints, in an allegorical language—in that accursed Aesopian language—to which tsarism compelled all revolutionaries to have recourse whenever they took up the pen to write a "legal" work. It is painful, in these days of liberty, to re-read the passages of the pamphlet which have been distorted, cramped, compressed in an iron vice on account of the censor. That the period of imperialism is the eve of the socialist revolution; that social-chauvinism (socialism in words, chauvinism in deeds) is the utter betrayal of socialism, complete desertion to the side of the bourgeoisie; that this split in the working-class movement is bound up with the objective conditions of imperialism, etc.—on these matters I had to speak in a "slavish" tongue, and I must refer the reader who is interested in the subject to the articles I wrote abroad in 1914-17, a new edition of which is soon to appear. In order to show the reader, in a guise acceptable to the censors, how shamelessly untruthful the capitalists and the social-chauvinists who have deserted to their side (and whom Kautsky opposes so inconsistently) are on the question of annexations; in order to show how shamelessly they screen the annexations of their capitalists, I was forced to quote as an example—Japan! The careful reader will easily substitute Russia for Japan, and Finland, Poland, Courland, the Ukraine, Khiva, Bokhara, Estonia or other regions peopled by non-Great Russians, for Korea. I trust that this pamphlet will help the reader to understand the fundamental economic question, that of the economic essence of imperialism, for unless this is studied, it will be impossible to understand and appraise modern war and modern politics.

Brings together more than one hundred articles dealing with the discipline of development in all its diversity. Key topics include the transformation of peasant economies, argibusiness, rural-urban relations, markets, industrialization, workers, trade, aid and structural adjustment. A unique set in its comprehensiveness and diversity, it also considers four key challenges for development theory and practice relating to capabilities, ethics, sustainability and regulation.
