Nick Case is one tough private investigator. He's big, he's black, and he's bad news if you cross him. He's a man's man but the ladies seem to love him...and we do mean love him. Nick is an excellent chef and a collector of guns and other dangerous weapons. He is no man to fool with. Nick loves country music and will defend his preference with vigor. He doesn't consider rap to even be music. Nick has to use all his resources on this case that threatened to swallow him. One of his best resources is his long time friend Tony DeAngelo who remained with the police department after Nick left. Yes, the story has interracial sex. It has a lot of sex and should not be missed by mystery lovers and lovers of hot sweaty black on white sex. "Case on the case" starts slow but hang on and get ready, because when it heats up it gets sizzling hot. You might need something to cool you down before you get to the end!

The relationship between resources devoted to education and the economy of developing nations is explored. The research seeks to understand if and how investment in education translates into increased economic growth and labor productivity. Additionally, the function of education in reducing various dimensions of economic inequality is examined. The two East African nations that are the study's focus, Kenya and Tanzania, have similar levels of income, but they differ markedly in their public policy toward the provision of secondary education and thus in the educational attainment of the labor force. The research findings provide strong backing for the human capital paradigm: educational expansion is shown to raise labor productivity. The results also show that making education less scarce diminishes inequality in access to education and in income. Numerous figures and tables of data appear throughout this volume; a list of 170 references is included. (DB)
