10 Innovative Learning Strategies For Modern Pedagogy

Very broadly speaking, your teaching style could be split into two different approaches. However, some people may identify themselves as being somewhere in the middle of these two approaches. The teacher-centred style puts the teacher as the expert in the classroom, and the students as the novices.

Contemporary science teaching approaches focus on fostering students to construct new scientific knowledge as a process of inquiry rather than having them act as passive learners memorizing stated scientific facts. Although this perspective of teaching science is clearly emphasized in the National Research Council's National Science Education Standards (NRC, 1996), it is however challenging to achieve in the classroom. Science teaching approaches should enhance students' conceptual understanding of scientific concepts which can be later utilized by students in

research tells us what expert teachers should be doing in their classrooms. This approach is based on the idea that teaching expertise is nothing more than the accumulation of specific skills and knowledge, and as teachers acquire these skills and knowledge most of our educational challenges can be overcome. This book questions this idea by asking 37 teachers who are already recognised as experts to share their classroom secrets. Importantly, the teachers come from diverse cultural contexts, including Australia, Finland, Hong
