Cornu Helicopter First In Flight Terpconnect free flight of a rotary-wing aircraft when it took to the air on 13 November 1907. Built by bicycle -maker Paul Cornu, it was an open-framework structure built around a curved steel tube that carried a rotor at either end, and the engine and pilot in the middle.

Cornu Helicopter First In Flight Terpconnect

Born: France Primarily active in: France. Paul Cornu was a French bicycle maker and pioneer in vertical flight who, in 1907, built the first helicopter prototypes to ever carry a human off the ground. In 1906, Cornu was well ahead of others who were attempting to build piloted helicopter concepts about that time.

Vertipedia - Paul Cornu

Cornu helicopter - development history, photos, technical data. The first true flight, free of any tie-down ropes, apparently was made by Paul Cornu, in another French machine later the same year, on November 13. His helicopter had two rotors mounted in tandem, one behind the other. The pilot sat between them, in intimate proximity to the little 24-horsepower Antoinette engine.

Cornu helicopter - development history, photos, technical data

This helicopter was the first flying machine to have risen from the ground using rotor blades instead of wings. Full length photograph of the Cornu helicopter . Paul Cornu ( French pronunciation: [pɔl kɔʁny] ; June 15, 1881 - 6 June 1944) was a French engineer.
