The Nobel Prize winning economist and best-selling author explains why saving Europe may mean abandoning the euro."

CLIL (Content and Language Integrated Learning) has emerged since the millennium as a

major trend in education. Written by Do Coyle, Philip Hood and David Marsh and drawing on their experience of CLIL in secondary schools, primary schools and English language schools across Europe, this book gives a comprehensive overview of CLIL. It summarises the theory which underpins the teaching of a content subject through another language and discusses its practical application, outlining the key directions for the development of research and practice. This book acknowledges the uncertainty many teachers feel about CLIL, because of the requirement for both language and subject knowledge, while providing theoretical and practical routes towards successful practice for all.

Despite nearly sixty years of European integration, neither nations nor national loyalties have withered away. On the contrary, national identity rhetoric seems on the rise, not only in politics but also in legal discourse. Lately we have seen a rise in the number of Member States invoking their national identity in an attempt to justify a derogation from a requirement imposed on them by a Treaty article or an EU legislative act, or to legitimize a particular national reading of such an EU norm. Despite this, the European Court of Justice (ECJ) has yet to develop a coherent approach to such arguments, or express a vision of the role national identity should play in EU law. Elke Cloots undertakes this task by providing a principled and coherent scheme for the adjudication of disputes involving claims based on the national identity of a Member State. Should arguments involving national identity be legally relevant? If yes, how should the ECJ approach such identity-related interests? Cloots crafts a normative framework to assist the ECJ in striking the right balance between European integration and respect for the identity concerns at issue. The book combines rigorous theoretical inquiry with thorough analysis of the European Treaties and case law, with particular attention paid to litigation involving domestic measures concerning the national system of government, constitutional rights protections, and language policy. Clarifying the issues at stake and presenting a solution to these problems, this book will be an invaluable resource for the academics, lawyers, and policy makers in the field.

This book presents in a single volume a comprehensive history of the language sciences, from ancient times through to the twentieth century. While there has been a concentration on those traditions that have the greatest international relevance, a particular effort has been made to go beyond traditional Eurocentric accounts, and to cover a broad geographical spread. For the twentieth century a section has been devoted to the various trends, schools, and theoretical framework developed in Europe, North America and Australasia over the past seventy years. There has also been a concentration on those approaches in linguistic theory which can be expected to have some direct relevance to work being done at the beginning of the twenty-first century or those of which a knowledge is needed for the full understanding of the history of linguistic sciences through the last half of this century. The last section of this book reviews the applications of some of these findings. Based on the foundation provided by the award winning Encyclopedia of Language and Linguistics this volume provides an excellent focal point of reference for anyone interested in the history of the language sciences.

Cities and city regions are growing throughout the world and this trend is forecast to continue well into the 21st century. The authors of *The Rise of the City* see the next 100 years as being the 'Urban Century'. In this book they examine urban growth

This illuminating analysis by one of the world's leading intellectuals addresses fundamental

questions about the new world disorder exemplified by the war on terrorism, the Iraq conflict and its aftermath and the current state of transatlantic relations. In eight concise chapters, Todorov discusses the use of force versus diplomacy, the emergence of new powers and the reactions of different players such as the UK, France, Poland and the United Nations, to the imperialist turn in US foreign policy. He argues that a new Europe is capable of reducing its dependence on the United States and assuming more responsibilities in the area of foreign affairs, would be the most effective way of counter-balancing America's current dominance of global politics. Drawing on his vast knowledge of history and philosophy, Todorov has written an insightful and timely book that, without simplifying the issues, is accessible to all.

In this innovative book Fabio Folgheraiter presents a systematic introduction to networking and reflexive practice in social work. The text explores how the interested parties in social care can acquire a shared power in care planning and decision making and that when this networking occurs, the efficacy of caring initiatives increases.
