Development in International Investment Law presents an important systematic study of the issue of sustainable development in the international investment law system, using conceptual, normative and governance perspectives to explore the challenges and possible solutions for making international investment law more compatible with sustainable development. Chi suggests that to effectively address the sustainable development concerns associated with transnational investment activities, the international investment agreements system should be reformed. Such reform should feature redesigning the provisions of the agreements, improving the structure of international investment agreements, strengthening the function of soft law, engaging non-state actors and enhancing the dispute

Country Negotiators

This book brings policy-making for sustainable development into the mainstream of decision-making at all levels of governance and in all sectors. It builds on the 2005 internationally agreed 'Mauritius Strategy' which aims to implement the integration of sustainable development by small island developing states. Designed as a handbook for policy-makers and planners in government, as well as business and civil society leaders, it covers seven of the twenty issues that have been outlined in the Mauritius Strategy as being important for the sustainable development of SIDS - disaster management; marine resources; freshwater resources; land resources; energy resources; tourism

resources and trade. It brings together best practices, policy options and development prospects that small states can pursue in order to achieve real progress in these fields. It covers the progress and experiences of countries in the Caribbean region, the Pacific region, and the Atlantic, Indian Ocean and Mediterranean region in their implementation of sustainable development in these areas. It also provides a useful point of reference and stimulus to policy-makers and their supporting colleagues from all sectors.

Redefining Success: Integrating Sustainability into Management Education advocates incorporating sustainability concepts that go beyond the financial 'bottom line' into management education and business

practice. Highlighting the UN Global Compact (UNGC), the Principles for Responsible Management Education (PRME) and the Sustainability Development Goals (SDGs), it explores conceptual and practical issues, presents case studies and other empirical evidence, and offers solutions that will both encourage and assist management educators in the incorporation of sustainability into their courses and research. Written by 34 individuals from 17 countries, the book addresses these topics from a variety of theoretical, disciplinary, geographic and organizational perspectives. The authors demonstrate how management educators, collaborating with business and civic organizations, can be change agents for a better world. Written for educators,

and topics, such as human resources development, market orientation, and knowledge management, this book is ideally designed for business managers, professionals, graduate students, and researchers working in the field of smaller-scale business development initiatives.

Our planet faces massive economic, social, and environmental challenges. To deal with these challenges, the United Nations has promoted 17 Sustainable Development Goals (SDGs) to define global priorities and aspirations for 2030, and Governments worldwide have already agreed on these goals. In order to approach them practically, private and public organizations have to contribute to make SDGs happen by identifying and executing sustainable strategies

as key drivers of their visions and business models. Building on the emerging concept of Integrated Thinking (IT), this book explores how modern organizations can leverage a long-term integrated strategy to reconcile financial stability with social and environmental sustainability and create enduring value for all stakeholders. By focusing on the value-creating role of business organizations in delivering on the promise of sustainable and inclusive development, the book enriches the debate on Integrated Thinking and Integrated Reporting (IR), with particular emphasis on the value creation process. This book offers an opportunity to discuss the way in which business organisations can rethink their management processes, accounting tools and reporting solutions, as they strive for both competitiveness and growth while

contributing to the achievement of the SDGs, and long-term value creation more broadly. Based on the analysis of different case studies, the book explores how organizations are approaching these challenges and how they are connecting SDGs, to business models and strategies. Analysing the impact of SDGs on materiality, connectivity, and stakeholder engagement, this book provides an insight into how Integrated Thinking, Management and Reporting is currently practiced and in which way these managerial innovations can contribute to SDGs.

education faculty, activists, curriculum developers, academicians, researchers, professionals, administrators, and policymakers.

This book analyzes the tension between the host state ' s commitment to provide regulatory stability for foreign investors – which is a tool for attracting FDI and generating economic growth – and its evolving non-economic commitments towards its citizens with regard to environmental protection and social welfare. The main thesis is that the ‘ stabilization clause/regulatory power antinomy, ’ as it appears in many cases, contradicts the content and rationale of sustainable development, a concept that is increasingly prevalent in national and international

law and which aims at the integration and balancing of economic, environmental, and social development. To reconcile this antinomy at the decision-making and dispute settlement levels, the book employs a ' constructive sustainable development approach, ' which is based on the integration and reconciliation imperatives of the concept of sustainable development as well as on the application of principles of law such as non-discrimination, public purpose, due process, proportionality, and more generally, good governance and rule of law. It subsequently re-conceptualizes stabilization clauses in terms of their design (ex-ante) and interpretation (ex-post), yielding stability to the benefit of foreign investors, while also mitigating their negative effects on the host state ' s power to regulate.

Read Free Integrating Sustainable Development Into International Investment Agreements A Guide For Developing

Sustainable development, as defined by the World Commission on Environment and Development, is "development that meets the needs of the present without compromising the ability of future generations to meet their own needs." More specifically, sustainable development is a process of change that seeks to improve the collective quality of life by focusing on economically, socially, and environmentally sound projects that are viable in the long-term. Sustainable development requires structural economic change and the foundation of that change is investment. In developing nations with low levels of domestic savings, investment predictably comes from abroad in the form of foreign direct investment. A large and ever expanding
