Adding 1 inch of propeller pitch will reduce full-throttle (WOT) RPM by 150 to 200. Subtracting 1 inch of propeller pitch will increase full-throttle RPM by 150 to 200. Moving from a 3-blade to a 4-blade propeller, a 4-blade generally turns 50 to 100 RPM less than a 3-blade propeller with the same pitch.

~~Outboard Boat Propellers~~

Did you know that propellers are a type of

File Type PDF Johnson Outboard Propeller Guide

fan that uses forced air to transmit power? Using pressure that is built up between the blades which rotate and use water as the accelerant, propellers convert motion into thrust. In boating, Johnson propellers are considered to be among the best.

Once you know the operating range, consult the propeller guide for your engine to pick a combination of pitch, blade number, and material. Choose a range of propellers to perform a water test. Test the props under the same conditions that you would typically use the boat—same load, gear, and water.
