Contents- Conflict Management for Project Managers, Nicki S. Kirchof and John R. Adams, 1982.- Contract Administration for the Project Manager, M. Dean Martin, C. Claude Teagarden, and Charles F. Lambreth, 1983.- Negotiating and Contracting for Project Management. Penny Cavendish and M. Dean Martin, 1982.- An Organization Development Approach to Project Management. John R. Adams, C. Richard Bilbro, and Timothy C. Stockert, 1986.- Organizing for Project Management, Dwayne Cable and John R. Adams, 1982.- The Project Manager's Work Environment: Coping With Time and Stress, Paul C. Dinsmore, M. Dean Martin, and Gary T. Huettel, 1985.- Roles and Responsibilities of the Project Manager, John R. Adams and Bryan W. Campell, 1982.- Team Building for Project Managers, Linn C. Stuckenbruck and David Marshall, 1985.

A guide to the project management tool covers such topics as creating tasks and assign constraints, estimating project costs, resolving scheduling problems, creating project reports, and consolidating projects.

Tells the story of a child's abuse at the hands of his alcoholic mother

This Element describes for the first time the database of peer review reports at PLOS ONE, the largest scientific journal in the world, to which the authors had unique access. Specifically, this Element presents the background contexts and histories of peer review, the data-handling sensitivities of this type of research, the typical properties of reports in the journal to which the authors had access, a taxonomy of the reports, and their sentiment arcs. This unique work thereby yields a compelling and unprecedented set of insights into the evolving state of peer review in the twenty-first century, at a crucial political moment for the transformation of science. It also, though, presents a study in radicalism and the ways in which PLOS's vision for science can be said to have effected change in the ultra-conservative contemporary university. This title is also available as Open Access on Cambridge Core.

The book is a cutting-edge contribution to the debate which has occurred for some time on the pros and cons of secondary education becoming more closely and explicitly related to preparing young people for the world of work. The book provides concrete examples of the vocationalisation of secondary education, with particular reference to the situation in Africa. The target audience for the book includes policy-makers, practitioners, administrators, education planners, researchers, teachers and teacher educators with a concern about the relationship between secondary education and education for the world of work (with particular reference to technical and vocational education and training - TVET.) The book appears in the

Springer book series on 'Technical and Vocational Education and Training: Issues, Concerns and Prospects' and compliments the 'International Handbook of Technical and Vocational Education and Training' and other publications in the' International Library of TVET' all of which are publications of the 'UNESCO-UNEVOC International Centre for TVET' in Bonn, Germany

First published in 1989. Routledge is an imprint of Taylor & Francis, an informa company.

Access to education is a fundamental human right under the Convention on the Rights of the Child, and represents a key tool to protect refugee children from recruitment into forced labour, military activity, prostitution and crime. The papers presented in this book were commissioned by the UNHCR and presented at a workshop on refugee education held in March 2001 in the United States. Issues discussed include: educational response in emergency situations; quality of refugee school programmes; youth education for peace and conflict resolution; and a case study of vocational training programmes in Tanzania.

The training and development of human capital in Sub-Saharan Africa (SSA) will help countries in the region diversify their economies, carry out economic transformation, and support sustainable growth. Higher education plays a key role in training qualified individuals who will be able to implement new technologies and use innovative methods to establish cost-efficient and effective enterprises and institutions. However, in order for SSA to reap the benefits of this investment in human capital, higher education institutions must secure financing to provide quality training and sound professional prospects to their students. Currently, tertiary education development is unsustainable resources per student are declining and the quality of education is affected. These issues are particularly pressing in times of financial global crisis, when available resources for tertiary education tend to diminish. The impact of the crisis that started in 2008 provides a clear illustration of the need to explore innovative ways to diversify and secure financing for higher education in SSA. 'Financing Higher Education in Africa' provides a comprehensive overview of higher education financing in SSA. The book begins with an explanation of the fundamental problems faced by higher education institutions and students in SSA, namely the combined pressure of a rapid growth in demand and a growing scarcity of public resources, and it presents the dramatic consequences of these trends on quality. The book then turns to analyzing and comparing the current funding policies in SSA countries and it provides recommendations for improvement. Finally, the book examines the alternatives to the status quo and the policy tools needed to both diversify resources and allocate them based on performance. It will be of great interest to governments, universities, research institutions, and international organizations throughout the region.
