The Astonishing Hypothesis : The Scientific Search for the ...

The Astonishing Hypothesis is a 1994 book by scientist Francis Crick about consciousness. Crick, one of the co-discoverers of the molecular structure of DNA, later became a theorist for neurobiology and the study of the brain. The Astonishing Hypothesis is mostly concerned with establishing a basis for scientific study of consciousness; however, Crick places the study of consciousness within a larger social context. Human consciousness according to Crick is central to human existence and so scie

The Astonishing Hypothesis: The Scientific Search for the ...

Crick's Astonishing Hypothesis is that, "a person's mental activities are entirely due to the behavior of nerve cells, glial cells, and the atoms, ions, and molecules that make them up and influence them." Thomas says that this means that Crick is saying that "humans are the superior species because they have souls and human beings are different [they have a soul] from other living things because their physiology is different."

The Astonishing Hypothesis | Protoscience | Fandom

The astonishing hypothesis is a strong affirmation of the (now) long held belief that minds follow from brains. As for consciousness itself, the assertion is straightforward - there's a bunch of facts about the external world that we are consciously aware of.
