"NBC: America's Network makes a significant contribution to our understanding of American broadcasting. Hilmes makes a convincing case for the appropriateness of an examination of a single firm, NBC, to illuminate the major themes and events of American broadcast history. In addition, she adeptly synthesizes a strong set of individually-authored chapters on specific historical periods, controversies, and program genres into a coherent whole. The writing is concise and lively and the breadth and depth of the material makes this a exceptional work."—William Boddy, author of New Media and Popular Imagination "NBC: America's Network is an outstanding book about one network across US television history. Hilmes is an excellent editor who brings broad insights about the television industry to bear on this volume. The individual essays present different approaches and methods, and together provide an integrated history of NBC with analysis that respects the medium and the people that worked in it."—Mary Beth Haralovich, co-editor of Television, History, and American Culture: Feminist Critical Essays. "Filled with highly readable essays by the top scholars in the field, NBC: America's Network explores key, often watershed moments in the network's history to illuminate the central role broadcasting has played in constituting public discourse about what is-and what is not-in the public interest. A welcome addition to the history of broadcasting, and essential reading for anyone interested in the transformative role of radio and TV in modern life."—Susan J. Douglas, author of Listening In: Radio and the American Imagination

TV Guide Nbc

A guide to collecting the television magazine which includes fifty years of national and regional covers, a history of television programming, a publication history of the guide, and a table of the current market value for each issue.

America ' s First Network TV Censor: The Work of NBC ' s Stockton Helffrichis a unique examination of early television censorship, centered around the papers of Stockton Helffrich, the first manager of the censorship department at NBC. Set against the backdrop of postwar America and contextualized by myriad primary sources including original interviews and unpublished material, Helffrich ' s reports illustrate how early censorship of advertising, language, and depictions of sex, violence, and race shaped the new medium. While other books have cited Helffrich ' s reports, none have considered them as a body of work, complemented by the details of Helffrich ' s life and the era in which he lived. America ' s First Network TV Censor explores the ways in which Helffrich ' s personal history and social class influenced his perception of his role as NBC-TV censor and his tendency to ignore certain political and cultural taboos while embracing others. Author Robert Pondillo considers Helffrich ' s life in broadcasting before and after the Second World War, and his censorial work in the context of 1950s American culture and emerging network television. Pondillo discusses the ways that cultural phenomena, including the arrival of the mid-twentieth-century religious boom, McCarthyism, the dawn of the Civil Rights era, and the social upheaval over sex, music, and youth, contributed to a general sense that the country was morally adrift and ripe for communist takeover. Five often-censored subjects—advertising, language, and depictions of sex, violence, and race—are explored in detail, exposing the surprising complexity and nuance of early media censorship. Questions of whether too many sadistic westerns would coarsen America ' s children, how to talk about homosexuality without using the word " homosexuality, " and how best to advertise toilet paper without offending people were on Helffrich ' s mind; his answers to these questions helped shape the broadcast media we know today.
