Collects stories that explore the tenuous bonds of family as they are tested by the sometimes brutal power of love and where characters are chased by troubles of their own making.

Current teaching, learning and assessment practices can lead students to believe that courses within a programme are self-sufficient and separate. Integrative Learning explores this issue, and considers how intentional learning helps students become integrative thinkers who can see connections in seemingly disparate information, and draw on a wide range of knowledge to make decisions. Written by international contributors who engaged reflectively with their teaching and their students' learning, the book seeks to develop a shared language of integrative learning, encouraging students to adapt skills learned in one situation to problems encountered in another, and make autonomous connections across courses, between experiences, and throughout their lives. More informed teachers can help students develop the necessary attributes for intentional learning, which include having a sense of purpose, fitting fragmentary information into a 'learning framework', understanding something of their own learning processes, asking probing questions, reflecting on their own choices, and knowing when to ask for help. Integrative Learning draws on international research and vast studies to provide the reader with the resources to ensure access to a unified learning experience. The book discusses conceptual and technical tools necessary for facilitating integrative learning across a range of disciplines as well as helping students develop the necessary attributes for intentional learning in the context of the relevance of higher education in the complexity and uncertainty of the 21st century. It will appeal to academics and researchers in the field of higher education, as well as those generating higher education curriculums.

Increasingly over the past decade, fan credentials on the part of writers, directors, and producers have come to be seen as a guarantee of quality media making—the “fanboy auteur.” Figures like Joss Whedon are both one of “us” and one of “them.” This is a strategy of marketing and branding—it is a claim from the auteur himself or industry PR machines that the presence of an auteur who is also a fan means the product is worth consuming. Such claims that fan credentials guarantee quality are often contested, with fans and critics alike rejecting various auteur figures as the true leader of their respective franchises. That split, between assertions of fan and auteur status and acceptance (or not) of that status, is key to unravelling the fan auteur. In A Portrait of the Auteur as Fanboy: The Construction of Authorship in Transmedia Franchises, authors Anastasia Salter and Mel Stanfill examine this phenomenon through a series of case studies featuring fanboys. The volume discusses both popular fanboys, such as J. J. Abrams, Kevin Smith, and Joss Whedon, as well as fangirls like J. K. Rowling, E L James, and Patty Jenkins, and dissects how the fanboy-fangirl auteur dichotomy is constructed and defended by popular media and fans in online spaces, and how this discourse has played in maintaining the exclusionary status quo of geek culture. This book is particularly timely given current discourse, including such incidents as the controversy surrounding Joss Whedon’s so-called feminism, the publication of Harry Potter and the Cursed Child, and contestation over authorial voices in the DC cinematic universe, as well as broader conversations about toxic masculinity and sexual harassment in Hollywood.

Almost everyone in Swine Hill is haunted, but when pig people appear in town, taking precious jobs at the pork processing plant and enraging the spirits, Jane will have to find a way to save her haunted family and escape the town before it kills her.

Around the Texts of Writing Center Work reveals the conceptual frameworks found in and created by ordinary writing center documents. The values and beliefs underlying course syllabi, policy statements, website copy and comments, assessment plans, promotional flyers, and annual reports critically inform writing center practices, including the vital undertaking of tutor education. In each chapter, author R. Mark Hall focuses on a particular document. He examines its origins, its use by writing center instructors and tutors, and its engagement with enduring disciplinary challenges in the field of composition, such as tutoring and program assessment. He then analyzes each document in the contexts of the conceptual framework at the heart of its creation and everyday application: activity theory, communities of practice, discourse analysis, reflective practice, and inquiry-based learning. Around the Texts of Writing Center Work approaches the analysis of writing center documents with an inquiry stance—a call for curiosity and skepticism toward existing and proposed conceptual frameworks—in the hope that the theoretically conscious evaluation and revision of commonplace documents will lead to greater efficacy and more abundant research by writing center administrators and students.

Creative Writing in the Community is the firstbook to focus on the practical side of creative writing. Connecting classroomexperiences to community-based projects, it prepares creative writing studentsfor teaching in schools, homeless centres, youth clubs and care homes. Each chapteris packed with easy-to-use resources including: specific lesson plans; case studies of students working with community groups; lists of suitable writing examples; “how to...” sections; examples and theoretical applications of creative writing pedagogy and techniques; reflection questions; writings by workshop participants. Enhanced by contributions from directors,students and teachers at successful public programs, Creative Writing in the Community is more than an essential guidefor students on creative writing courses and leaders of community-basedlearning programs; it is practical demonstration of the value of art in society.

A noted poet presents a full-length memoir based on her autobiographical “Ploughshares” essay that recounts her struggles with alcoholism and search for answers after her son’s death from leukemia.

The University of Central Florida has stood at the edges of Orlando for 40 years, a major institution of research, culture, education, and professional development stitched into the fabric of one of the nation’s most dynamic and influential metropolitan areas. Conceived in 1963, at the height of America’s fascination with the space program and less than an hour from Florida’s Space Coast, the school began as Florida Technological University, a vast and remote tract of wild palmettos and swampland that held the promise of a cutting-edge “Space University.” But 1963 was the same year that Walt Disney made his fateful fly over Central Florida and chose the location for Walt Disney World, a decision that would ultimately transform the entire region. Florida Tech found itself growing along with the surrounding community in size, prominence, and power into a diverse institution that no one in those early years could have envisioned. Renamed the University of Central Florida in 1979 to better reflect its broad curriculum and its strong marriage with the region, the school has blossomed into the prototype for the modern metropolitan university.

The beguiling stories in Electricity & Other Dreams are in their own category, which might be described as Southern gothic meets tall tale meets dirty realism. In these magical yet down-to-earth stories we meet an old man made out of cans, an electrician who makes light simply by touching a bulb, a weatherman who arranges his own weather, a plumber who also gets rid of ghosts. Fortune cookie fortunes actually come true, alligators work in a factory, and Japanese warlords battle on a jet plane. And then there’s the killer crawfish. Every story in this fantastic collection is gorgeously gritty and lots of fun. Micah Dean Hicks is a true original. ELIZABETH STUCKEY-FRENCH O. Henry Award-winner and author of The Revenge of the Radioactive Lady

Fans of Jason Reynolds and Sharon M. Draper will love this oh-so-honest middle grade novel from writer and educator Maurice Broaddus. Thelonius Mitchell is tired of being labeled. He’s in special ed, separated from the “normal” kids at school who don’t have any “issues.” That’s enough to make all the teachers and students look at him and his friends with a constant side-eye. (Although his disruptive antics and pranks have given him a rep too.) When a gun is found at a neighborhood hangout, Thelonius and his pals become instant suspects. Thelonius may be guilty of pulling crazy stunts at school, but a criminal? T isn’t about to let that label stick.
