evidence that climate change is changing the wildfire story in California"--

Early morning on Monday, October 9, 2017, wildfires burned through Northern California, resulting in 44 fatalities. In addition, 6,200 homes and 8,900 structures and were destroyed. Author Brian Fies ' s firsthand account of this tragic event is an honest, unflinching depiction of his personal experiences, including losing his house and every possession he and his wife had that didn ' t fit into the back of their car. In the days that followed, as the fires continued to burn through the area, Brian hastily pulled together *A Fire Story* and posted it online—and it immediately went viral. He expanded his original web comic to include environmental insight and the fire stories of his neighbors and others in his community. This paperback version includes 32 new pages that bring the story up-to-date. *A Fire Story* is a candid testimony of the wildfires that left homes destroyed, families broken, and a community determined to rebuild.

In October 1947, Maine experienced the worst fire disaster in its history. *Wildfire Loose* describes how the fires started and spread so quickly through rural villages, down Millionaire ' s Row in Bar Harbor, and across southern Maine beach resorts. Originally published in 1979, it remains the definitive account of “ *The Week Maine Burned.* ”
